EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ronald Slusky on 08/31/2004.

The application has been amended as follows:

claim 4,

lines 2-3, change "first edge router" to become "first network edge device",

lines 4-5, change "second edge router" to become "second network edge device";

Claim 5,

lines 2-3, change "first edge router" to become "first network edge device",

lines 4-5, change "second edge router" to become "second network edge device".

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Regarding claims 3, 23 the prior arts fail to disclose a method for connecting a call between a calling party and a called party, comprising:

translating a first global address into a second source address, the second source address being local to a third network;

translating a second global address into a second destination address, the second destination address being local to the third network and being associated with a called party, within the structure of the claims.

Regarding claim 37 the prior arts fail to disclose a method for connecting a call between a calling party and a called party, comprising;

sending a first global address from a first network edge device to a second network edge device, the first network edge device connecting the first network and a second network, the second network edge device connecting a third network to the second network; and

translating the first global address into a second local address, the second local address being associated with the third network, within the structure of the claim.

Regarding claim 42 the prior arts fail to disclose method for connecting a call between a calling party and a called party, comprising:

receiving, from a first network edge device at a second network edge device, a first global address that is a translation of a first local address, the first local address being associated with a first network, the first network edge device connecting the first network and a second network, the second network edge device connecting a third network to the second network; and

translating the first global address into a second local address, the second local address being associated with the third network, within the structure of the claim.
